

Milk Is a Local Food

Milk travels from the cow to the grocery store in about 48 hours.

1

Healthy cows provide milk.

2

Milk is cooled to below

45°

3

A tanker transports milk to a milk plant.

4

Ongoing testing is done for quality and safety.

5

Milk is pasteurized, homogenized & put into bottles.

6

Milk is transported to the grocery store.
